EXPERIENCE

Loblaw Digital, Senior Developer | Hybrid (Toronto, CA)

November 2025 - Present

- Lead the development of a backend customer engagement platform using Java Spring Boot and GCP Pub/Sub, achieving a 130% increase in customer engagement within 2 months of product launch for pharmacy applications.
- Lead Backend solution with using Apache Airflow for job scheduling pulling data file from SFTP server and process into Big Query table and compute document to push into Elastic Engine
- Lead the development of high-performance web applications using Next.js and React, enhancing user experience and increasing legacy application speed by 30%.
- Architected and delivered scalable backend solutions for multiple initiatives, accelerating feature deployment by 30% and supporting high-volume API traffic with robust reliability.
- Led a cross-functional team of 5 developers to deliver 3 high-quality backend products in 2 months, improving project throughput and reducing time-to-market.
- Designed and managed network layers using Apigee proxies and Akamai domain configurations, enhancing API security, performance, and uptime.
- Developed a BFF (Backend-for-Frontend) service with Java Spring Boot, Maven, and WebFlux.
- Built an API Orchestrator service to aggregate multi-API responses, streamlining frontend integration and accelerating feature delivery across products.
- Implemented rigorous code review processes and mentorship programs, onboarding junior developers and increasing team productivity while maintaining high code quality standards.
- Drove technical excellence and solution innovation, enabling the adoption of modern frameworks and practices that improved maintainability and scalability of backend systems.

Loblaw Digital, Developer II | Hybrid (Toronto, CA)

July 2022 - November 2025

- Utilized modern frontend tools such as code-splitting, server-side rendering, and static site generation, along with GraphQL client fetching, to enhance performance and SEO.
- Developed custom components and templates for Contentful, enabling seamless content management and delivery through the BFF application layer.
- Designed and developed scalable backend services using Java Spring Boot, enhancing system performance and reliability.
- Managed MySQL databases, optimizing queries and performing regular maintenance to ensure data integrity and performance.
- Utilized GCP services such as Cloud Storage, Cloud Pub/Sub, and Cloud Functions to build resilient and efficient backend systems.
- Automated deployment processes using CI/CD pipelines, reducing manual intervention and accelerating release cycles.

Quantum Mob, Software Developer | Remote (Toronto, CA)

Jan 2022 - July 2022

- Conducted React web application with Redux, MariaDB, and Redis to perform online redemption system.
- Collaborated with the Loblaw Digital eCommerce team to develop a Snowplow Analytics library for tracking customer web activities.

Sumer Inc. , Co-Founder and Full Stack Developer | Toronto, CA

Oct 2019 - July 2022

- Evaluated Sumer Inc.'s technical design, created system flow diagrams, and identified optimal solution architecture.
- Managed and developed React Native/React and GraphQL backend solutions with AWS, delivering iOS and Android applications within an Agile timeline.
- Created GraphQL resolvers on the backend to efficiently fetch and return data matching frontend GraphQL queries.

Be A Part Of, Full Stack Developer | Toronto, CA

Feb 2021 - Jan 2022

- Installed customization system within client's remote service, Integrating with C and .Net mapping with Node.JS application through MINIBC Payment services.
- Using EmberJS, PHP and MySQL create customer analytical dashboard.
- Combined Angular, to conduct customization application inject to e-commerce platform and help manage subscription and checkout with micro-services structure and PHP.

QUAD-FI , Full Stack Developer | Toronto CA

Nov 2020 - Feb 2021

- Developed a web application using React/Redux and Node.js/Express.js, deployed on Google Cloud Platform with AppRun services.

SKILLS

Languages & Scripting	Java, JavaScript, TypeScript, Python, Node.js, PHP, C#, Bash
Database Technology	MySQL, PostgreSQL, MongoDB, Redux, Apollo, Docker, Bash, LaTeX, Vim
Frontend	React, Next.js, AngularJS, Redux, Apollo Client, SSR/SSG, CMS Integration (Contentful, Gatsby)
Frameworks & Backend	Spring Boot, REST APIs, GraphQL, Apache Airflow, Event-Driven Architecture, BFF Pattern
Data & Storage	MySQL, PostgreSQL, MongoDB, Redis, BigQuery, Elasticsearch, Cloud Storage, GCS Buckets
DevOps & Cloud	GCP (Pub/Sub, Functions, Cloud Run, Logging), AWS, GitLab CI, Docker, Kubernetes, NX, Terraform
Tools & Other	VS Code, JetBrains, JIRA, Vim, LaTeX

Certificates

Jr Penetration Tester

PROJECTS

FastPass for All – Event-Driven Customer Service

Loblaw Digital Toronto, CA

- Developed an event-driven service using Java 21, Spring Boot, and GCP Pub/Sub to manage customer access experiences. Resulted in a 130% increase in engagement within three months.

PCH WEB

Toronto, CA

- Utilize NextJS SSR to reduce application run time and combine Contentful CMS and GraphQL query fetch to consume content data without developer involved.
- Using Redis to achieve Caching layout, reduce total API call with fetching data from CMS to speed up the application

LOBLAWS DIGITAL SNOWPLOW ANALYTICS LIBRARY

Toronto, CA

- Developed and implemented a customized Snowplow Analytics library to track specific user actions on web applications.

EDUCATION

UNIVERSITY OF TORONTO, *BS in Statistic | Specialist of Data Mining and Machine Learning |*
Toronto, CA

April 2020
