EXPERIENCE

Loblaw Digital, Developer II | Hybrid (Toronto, CA)

July 2022 - Present

- Led the migration of a large-scale Next.js application to an NX Monorepo, enhancing modularity, reusability, and build efficiency.
- Owned the Account Creation and Account Management frontend modules, implementing routing logic, API integration, and UI architecture.
- Directed technical architecture efforts across high-impact projects in collaboration with cross-functional teams.
- Designed and implemented "FastPass for All," an event-driven backend service using Java 21 and Spring Boot, integrated with GCP Pub/Sub. Post-launch, the service increased customer engagement by 130% within three months.
- Built data pipelines using Apache Airflow to automate ingestion from SFTP servers into BigQuery and Elasticsearch.
- Developed custom Contentful components and templates integrated into the BFF layer for scalable content delivery.
- Created backend services with Java Spring Boot and deployed them using GCP services such as Pub/Sub, Cloud Functions, and Cloud Storage.
- Automated CI/CD pipelines using GitLab Actions, significantly reducing deployment time and improving release reliability.
- Mentored junior developers through code reviews, onboarding, and hands-on guidance.

Quantum Mob, Software Developer | Remote (Toronto, CA)

Jan 2022 - July 2022

- Developed a React web application with Redux, MariaDB, and Redis for an online redemption system, and collaborated with Loblaw Digital to build a Snowplow Analytics library for tracking customer web activity.

Sumer Inc. , Co-Founder and Full Stack Developer | Toronto, CA

Oct 2019 - July 2022

- Evaluated Sumer Inc.'s technical design, created system flow diagrams, and identified optimal solution architecture.
- Managed and developed React Native/React and GraphQL backend solutions with AWS, delivering iOS and Android applications within an Agile timeline.
- Created GraphQL resolvers on the backend to efficiently fetch and return data matching frontend GraphQL queries.

Be A Part Of, Full Stack Developer | Toronto, CA

Feb 2021 - Jan 2022

- Integrated a Node.js application with C and .Net mapping via MINIBC Payment services, while also building a customer analytics dashboard using EmberJS, PHP, and MySQL.

QUAD-FI , Full Stack Developer | Toronto CA

Nov 2020 - Feb 2021

- Developed a web application using React/Redux and Node.js/Express.js, deployed on Google Cloud Platform with AppRun services.

SKILLS

Languages & Scripting	Java, JavaScript, TypeScript, Python, Node.js, PHP, C#, Bash
Database/Technology	MySQL, PostgreSQL, MongoDB, Redux, Apollo, Docker, Bash, LaTeX, Vim
Frontend	React, Next.js, AngularJS, Redux, Apollo Client, SSR/SSG, CMS Integration (Contentful, Gatsby)
Frameworks & Backend	Spring Boot, REST APIs, GraphQL, Apache Airflow, Event-Driven Architecture, BFF Pattern
Data & Storage	MySQL, PostgreSQL, MongoDB, Redis, BigQuery, Elasticsearch, Cloud Storage, GCS Buckets
DevOps & Cloud	GCP (Pub/Sub, Functions, Cloud Run, Logging), AWS, GitLab CI, Docker, Kubernetes, NX, Terraform
Tools & Other	VS Code, JetBrains, JIRA, Vim, LaTeX

PROJECTS

FastPass for All – Event-Driven Customer Service

Loblaw Digital Toronto, CA

- Developed an event-driven service using Java 21, Spring Boot, and GCP Pub/Sub to manage customer access experiences. Resulted in a 130% increase in engagement within three months.

PCH WEB

Toronto, CA

- Utilize NextJS SSR to reduce application run time and combine Contentful CMS and GraphQL query fetch to consume content data without developer involved.
- Using Redis to achieve Caching layout, reduce total API call with fetching data from CMS to speed up the application

LOBLAWS DIGITAL SNOWPLOW ANALYTICS LIBRARY

Toronto, CA

- Developed and implemented a customized Snowplow Analytics library to track specific user actions on web applications.

EDUCATION

UNIVERSITY OF TORONTO, BS in Statistic | Specialist of Data Mining and Machine Learning |
Toronto, CA

April 2020
